Re: Get the Lead out, Lead Water Testing.

The Wellington-Napoleon R-IX School district completed the state required lead water testing of all potable water sources in the Fall and Winter of the 2023-2024 school year. The results were calculated, and of the 41 total testing areas, there were 5 water sources that tested above the 5 parts/billion threshold. These 5 areas were deemed unusable and mitigation efforts were taken to comply with the legislation deadline of the start of school in August 2024. All water sources that tested above the state limits were restricted for potable use while mitigation measures were conducted.

The areas that tested over the 5 parts/billion were as follows:

1. Training Room Ice Machine
2. Ele Playground Water Fountain
3. HS Science Sink 2 (Room 203)
4. HS Science Sink 3 (Room 203)
5. HS Science Sink 4 (Room 203)

In the summer/fall of 2024 mitigation follow-up testing of potable outlets occurred at WN R-IX. All outlets testing above the 5 parts/billion threshold (listed above) were placed out of use until mitigation efforts and retesting were able to be completed. Each of the outlets above were retested after mitigation measures were placed in effect and have successfully been mitigated (testing below 5 parts per billion) and deemed usable for potable measures per state statute [RSMo 160.077: Get the Lead Out of School Drinking Water Act \(2022\)](#). See attached initial testing results, as well as post-mitigation follow-up testing results.

Sincerely,

Brad Briscoe
Superintendent
